Let's enter the loop

Act now to build a better tomorrow

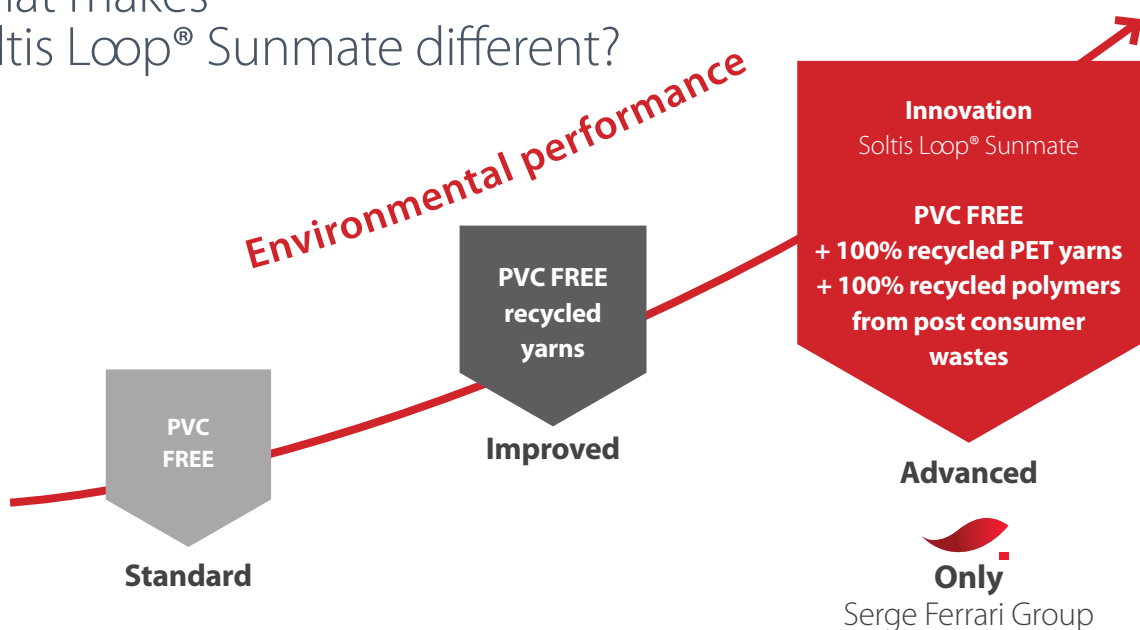

Loop is a new generation of innovative products, made of 100% recycled materials, which embodies our sustainable approach : "+ = 0".

This formula reflects our will for lighter, more durable and high-performance membranes, without any additional environmental impact. Aiming at saving natural resources, the Loop range is a forerunner of tomorrow, when we will be able to do even more with less.

Loop - the first range of composite membranes on the market made of 100% recycled polyester yarns and polymers.

Detailed method

Takes into account transmission and reflection spectral values for glazing-blind combination to calculate solar factor, g_{tot}^i .
Type "D" glazing: insulating double glazing - face 2 lowly emissive (4 + 16 + 4; argon-filled) $g = 0.32$ - $U = 1.1$.
